PROJECTS

FreeChat Communication App (<https://github.com/jthnguyen9909/freechat>)

Real-time chatroom application with user account and whisper functionality.

- Allows users to send messages with their associated username and timestamp.
- Users are able to see others who are currently online and directly message them.
- Tools Used: React, MySQL2/Sequelize, Express.js, Socket.io, MaterialUI

Vacayte Travel App (<https://github.com/monysary/vacayte-travel-app>)

Travel Planning App for users to organize and create an itinerary to plan their vacation.

- Mobile responsive web app with account functionality and individual trip creation
- Tools Used: React, Express.js, MongoDB, MaterialUI, Yelp Fusion API

CommuniTEA Social Media App (WIP) – (<https://github.com/jthnguyen9909/communithea>)

Social Media Application for users to search nearby boba stores and relevant reviews

- Utilizes Yelp API calls to dynamically render stores based on inputted location. Users are able to add their own reviews and favorite stores to profile.
- Tools Used: React, MongoDB/Mongoose, GraphQL, Ant Design, Heroku, Express.js, Yelp Fusion API
