**Languages:** HTML/CSS, JavaScript, React, Node.js, Express.js, MySQL, Sequelize, MongoDB  
**Tools/Libraries:** Github, Insomnia, Material UI, Bootstrap, Heroku, Ant Design

## PROJECTS

---

### CommuniTEA Social Media App – (<https://github.com/UCI-team-project/communiTEA>)

Social Media Application for users to search nearby boba stores and relevant reviews

- Utilizes Yelp API calls to dynamically render stores based on inputted location. Users are able to add their own reviews and favorite stores to profile.
- Tools Used: React, MongoDB/Mongoose, GraphQL, Ant Design, Heroku, Node.js, Express.js, Yelp Fusion API

### Pokemon Fusion App (<https://github.com/wangbrian26/Pokemon-Fusion-Battle-Simulator>)

Pokemon-like game using Pokemon Fusion generations and custom user monsters.

- Uses the Pokemon Fusion API to randomly generate a fusion pokemon and the official Pokemon API to generate battle stats for each generated pokemon.
- Tools Used: HTML/CSS, Vanilla JavaScript, Pokemon Fusion API, PokeAPI

### React Portfolio (<https://johnathannguyen.dev>)

My web-development portfolio for introducing myself for any new connections.

- Created using React as a basis to enhance the performance and reliability
- Tools Used: React, Material UI, JQuery, Bootstrap, Animate.css, FontAwesome
